

MOTORISATION OPTION

MOTORISATION

Imagine being able to open and close your window coverings from any room in the house or anywhere in the world. What about blinds and awnings that can be programmed to open and close themselves, and stop exactly where you want?

With Apollo's MaxiSMART® Automation System you can control your internal and external window coverings with a touch of a remote control button, a swipe on your smart device, or a simple voice command to an automated device such as Google® Home, Amazon® Alexa® or Siri.

From reliable, whisper quiet motors, to the latest in Wi-Fi technology and smart Apps, Apollo puts you in total control.

Comfort – Open and close your window coverings as you please, from the comfort of your chair, the lounge, or even your bed! You can even program them to open automatically, so you can check out the weather before your feet hit the ground.

Convenience – The Connector App makes it incredibly easy to set timers and operate your window coverings, whenever you like, from anywhere in the world.

Security – You can program your window coverings to open and close at set times when you are not home, so potential intruders assume someone is inside.

Child Safety – There are no cords or chains for small children to become entangled. **Energy Efficiency** – Save on energy costs by setting your window coverings to close during the hottest part of the day in summer and open as the sun rises in winter.

Limited Mobility – Those with limited mobility have greater control. All their window coverings can be operated without the need to touch them or be near them.

Awkward Window Access – Motorisation opens up a world of unique architectural possibilities. Window cov

**BATTERY OPERATED
REMOTECONTROL MOTOR R-2/28 RTS
(LI-ION)**

MOTORISATION OPTIONS

Ziptrak®, Straight Drop Roller, Wire Guide, FlexiFit Pivot Arm,
Convertible Awning, Fixed Guide, Enduragard® Roller Shutters.

MaxiSMART® 240V remote control Awning Motor A-40/15 RT S

Key Features

- Radio Technology System (RTS) operated by any MaxiSMART® remote
- Electrician required.
- Remote controls available: 1 channel wall mounted, handheld 5 channel with timer or 15 channel.
- Obstacle Detection This innovative feature detects obstacles like chairs or tables left underneath the awning. If an obstruction is detected, the motor will stop the awning approximately 200mm above it. This prevents potential damage to the fabric or awning itself, keeping your setup in perfect condition
- Wi-Fi enabled motor compatible with the connector app enabling you to view the exact position of their blind. Set up rooms and manage multiple timers effortlessly. Integrate with home automation like Google home, Amazon Alexa and Apple Home.
- Longer lifespan compared to battery motor.
- 5 year warranty.

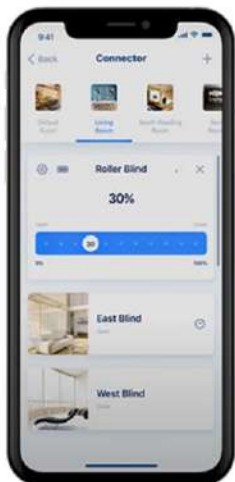

MaxiSMART® WI-FI BRIDGE Key Features

- Wi-Fi Bridge links the motors of your window coverings to your home Wi-Fi router.
- Compatible with the connector app enabling you to view the exact position of their blind.
- Set up rooms and manage multiple timers effortlessly.
- Integrate with home automation like Google home, Amazon Alexa and Apple Home.
- Recommended for larger homes or where more than 10 motors are connected to the Wi-Fi.

CONNECTOR APP Key Features

- 'Connector' is a free app for your smartphone or tablet. It's user friendly interface allows you to operate up to 30 motorised window coverings via MaxiSMART®, Wi-Fi Bridge. It also links Google® Home, Amazon® Alexa® or Siri to your Wi-Fi Bridge, so you can use voice commands to control your window coverings.
- Set up rooms and manage multiple timers effortlessly.
- Integrate with home automation like Google home, Amazon Alexa and Apple Home.
- Compatible with Wi-Fi enabled motors and MaxiSmart Wi-Fi Bridge.

MOTORISATION OPTIONS

Folding Arm Awning

Rain Sensor Key Features

- Ideal for situations where the awning can't be installed with a steep enough pitch to allow the rain to run off
- Awning will automatically retract when it begins to rain
- Alternately the wires can be reversed to extend the awning to protect furnishings when it starts to rain
- Not compatible with MaxiSMART® technology
- 2 year warranty

Sun & Win Sensor Key Features

- The sun sensor extends the awning when the sun hits the windows of your home then retracts it when the sun goes down
- The wind sensor will retract the awning when the wind becomes strong
- Not compatible with MaxiSMART® technology
- 2 year warranty

Motion Sensor Key Features

- A small box attached to the front of the awning which detects motion so when it moves it retracts the awning
- Wind detection in 3 dimensions, horizontal, vertical and lateral oscillation
- Not compatible with MaxiSMART® technology
- Electrician not required
- 2 year warranty

Remote Control Motor Key Features

- There are many options for remote controls for your folding arm awning including single channel, multi channel and remotes with timers as well as many styles.
- Only remotes from the same motor manufacturer are compatible and remote options may vary if you require additional products like motion sensors, rain sensors etc. Please check the compatibility with your adviser
- Electrician required
- Not compatible with MaxiSMART® technology
- 5 year warranty
