Apollo Blinds - Fashion Collection

BLINDS • AWNINGS • SHUTTERS • CURTAINS • SCREENS

Try our NEW HomeView Visualiser today

Want to know what some new
blinds, awnings or shutters will
look like in your home?

Try out our new HomeView visualiser
today and you can try before you
buy.

**This platform will only work on smartphones &
tablet browsers.*

Blending elegant aesthetics with advanced functionality, our visually stunning Blinds, Awnings, Shutters, Curtains, and Security Screens are crafted in a superb selection of contemporary styles, colours, and materials to help you achieve the look and feel you want.

Many incorporate the latest motorisation and home automation technology. We've even created an online app so you can see how our products will look in your home before you buy.

Simply upload a photo of your window to the **HomeView Visualiser** on our website and start designing. When quality matters, Apollo's enduring commitment shines.

We began in 1988, manufacturing "Cash & Carry" vertical blinds and offering innovative in-home measure & quote services. Today we are still proudly Australian-owned and operated, and you can still rely on our design consultants to offer the best expert advice and an obligation-free measure & quote.

“Curated for **Australian** homes and lifestyles, our latest collection has all you need to create your perfect space.”

Longing for Inspiration?

APT, Automated Paint Technology, is a Shutter that uses an Automated painting process to provide a quality, consistent, smooth and defect free paint finish.

Each component is individually painted, thermally dried and then wrapped in a protective film for added protection during assembly process. The Acrylic paint has UV inhibitors added to protect your shutters from the harsh Australian sun. APT offers the most popular choices, and combining notched blades to attach the clearview tiltrod, makes APT real value for money.

Available in Smartwood™ and Timber

APT Louvre Shutters

Australian Smartwood® Shutters

APT, **Automated Paint Technology** is a Smartwood PVC Polymer Shutter that uses an Automated painting process to provide a quality, consistent, smooth and defect free paint finish.

Each component is individually painted, thermally dried, and then wrapped in a protective film for added protection during the assembly process. The Acrylic paint has UV inhibitors added to protect your shutters from the harsh Australian sun. The frame selections include the most popular choices and combining notched blades to attach the Clearview tilt rod, one-way closure **only**.

“ **Smartwood** is an environmentally friendly, non-toxic PVC polymer that is harder than timber – so they won't crack, chip, split or warp, even scratches are hardly noticeable. The blades have a cellular aluminium rod insert for added strength and stability allowing spans to be wider. ”

They have a UV protected paint finish and are easy to clean. Smartwood's ability to resist flames, moisture, bacteria and termites makes them the smart choice for wet areas.

”

ICON Smartwood™ Shutters

ICON Plantation Shutters

Apollo's quality range of **Plantation Shutters** have been chosen from the best possible materials. The aim is to provide you with the choice of the best products available on the market that will suit your aesthetic and functional requirements. You can choose from the beauty and warmth of Western Red Cedar or Tilia (Basswood).

Western Red Cedar is a medium density, lightweight softwood that offers the best insulating qualities of all timbers.

Tilia is a hardwood, kiln dried to about 10% moisture content to increase its stability and resistance to bowing, warping, knocks and bumps. Harmony is the latest Plantation Shutter in the Apollo range. It combines the lightweight strength of Tilia (Basswood) with the impact resistance of Smartwood PVC polymer.

The blades and frames are made from non toxic PVC polymer that resists, cracking, chipping, splitting and warping. The stiles and rails are made from Tilia Timber.

All our Plantation Shutters have bi-directional closure which allows for easy cleaning and are available with aerofoil blades. They can be constructed in circular, arched and angled styles to suit modern décor.

e13 Aluminium Shutters

Apollo has fused stunning good looks with lasting durability in their Aluminium Shutters for outdoor conditions. Created from hard wearing, chip resistant powder coated aluminium, they offer a long lifespan and superior performance with a back aluminium tilt bar and bi-directional closure as standard.

Apollo **Aluminium Shutters** are available in sliding, bi-fold, hinged or fixed styles and have adjustable standard or fixed blades.

Roller Blinds

Roller Blinds are the most popular blind on the market today. Available in a large range of colours, performance fabrics and eco-friendly screen fabrics they have chain control operation as standard. Rollers come with an aluminium bottom bar, decorator trims and stylish colour co-ordinated brackets.

Apollo Rollers are available in light filtering, sunscreen or blackout fabrics. Light filtering allows light to filter through while protecting from the sun and offering privacy. Sunscreen fabric allow you to enjoy the view outside, allowing in the optimum level of light while controlling the heat and blocking out up to 90-97% of harmful UV rays (depending on the openness factor). Sunscreen fabrics offer 3 levels of openness - 3%, 5% or 10%. Blackout fabrics offer room darkening and are great for bedrooms.

Rollers are very versatile. Two Rollers installed on a double bracket can cover one window in tandem, providing screen fabric for the day and blockout for the night. Using our link system, you can operate up to three Rollers side by side simultaneously with one chain. Apollo's MAXILift® Fixed Clutch and MAXILift® Swivel creates a smooth lifting operation and reduces the need for a helper spring. MAXILift® Swivel also stops chains on a double brackets from tangling.

Today, motorising your blinds is so easy. Apollo's MaxiSMART® motorisation hub allows Roller blinds to be operated at the touch of a button, a tap on your mobile device, or simply the sound of your voice, when integrated with the world's most popular automation devices like Google® Home or Amazon® Alexa®.

Not only can you program your blinds and awnings to automatically operate, you can also control them while you're away from home using your smart device.

Veri Shades® are the very latest in window coverings. They look like curtains but have the versatility of blinds. At the turn of the wand you can adjust the amount of light entering your room. Their individual panels part effortlessly, so you can walk through them whether they are open or closed. They simply sway out of the way and settle back perfectly.

Veri Shades®

Curtains

Introducing Apollo's new curtain collection. From super sheers, voiles, linen looks to linen blends we have the right curtain for your home or office. Our curtains are available in a range of neutral colour fabrics and a wand control is standard. There are 4 heading options, S-Fold, S-Wave, Double Pinch Pleat or Triple Pinch Pleat and motorisation is available.

Versatile Verticals for the smallest window to sliding doors. Verticals combine function and fashion to great effect. They are mould and fade resistant, have an anti static dust resistant coating and a wipe clean surface. They come in 89mm and 127mm slat widths and with the option of standard weights and chains, sewn in bottom weights or chainless bottom weights.

A wand control option is also available.

Apollo brings fashionable elegance to the home with their range of Panel Glides. Unlike Rollers they allow flat panels of fabric to slide across the window rather than rolling up. Ideal for doors, large windows and as room dividers.

They can be co-ordinated with matching fabric for Vertical, Roller and Roman Blinds.

Panel Glides

Apollo's Smartwood® Venetians bring the ambiance of Timber Venetians within every-one's reach. The perfect alternative to natural wood. Smartwood is an environmentally friendly, non-toxic PVC polymer that is harder than timber – so they won't crack, chip, split or warp, even scratches are hardly noticeable.

Smartwood's ability to resist flames, moisture, bacteria and termites makes them the smart choice for wet areas. Motorisation option is available for safety and convenience.

Smartwood® Venetians

Roman Shades

The classic Roman Shade at home with every décor from the traditional to the contemporary. Their soft fabric look makes Romans very appealing for creating a comfortable atmosphere. Available in light filtering, blockout and sunscreen fabrics. With the choice of a cord and cleat, cord lock or chain operation.

Motorisation option is available for safety and convenience.

Aluminium Venetians

Smooth, elegant Aluminium Venetians control the light at a touch, transforming rooms from bright and breezy to soft and subtle. The timeless style of Apollo Aluminium Venetians feature a large range of colours across 2 slat widths, Slimline (25mm) and Classic (50mm).

“ **Apollo's** range of Timber Venetians adds warmth and good looks to your home, offering a range of contemporary colours and wood grains. Available in Basswood which is a hardwood. ”

Timber Venetians

Cellular Shades are composed of a cellular design that maximises energy efficiency and insulation.

Manufactured with a high quality polyester fabric, there are a variety of cell sizes, textures and fabrics to choose from.

These options compliment your desired comfort and style. The cell sizes are 25mm and 38mm and are available in translucent, blackout and double cell.

Cellular Shades

This innovative two-in-one blind offers you the convenience of two fabrics on one roller.

Choose from a light filtering and sheer fabric, or a dim out and sheer fabric.

Both control the light or glare through your window beautifully.

Viewline Shades include chic pelmets and colour options to match the bottom rail and control chain.

Viewline Shades

Blind & Curtain Options

Motorisation

Apollo's MaxiSMART® motorisation hub allows many of our blinds and awnings to be operated at the touch of a button, a tap on your mobile device, or simply the sound of your voice, when integrated with the world's most popular automation devices like Google® Home or Amazon® Alexa®. Not only can you program your blinds to automatically operate, you can also control them while you're away from home using your smart device.

Double Brackets

These allow 2 Roller blinds to be on the one window and operated independently of each other. A Screen Blind to let in the view in the daytime and a blackout for privacy at night. Double

Link System

Allowing side by side Roller Blinds to be operated by one or two controls either manually or by remote control.

Wire Guides

Roller Blinds traverse up and down wire guides to restrict excess movement of the blind when windows are open.

MaxiLift® Fixed Clutch and MaxiLift® Swivel

Allows a smooth lifting operation and reduces the need for a helper spring plus MaxiLift® Swivel stops chains on double brackets from tangling.

FRS Valance

This valance is a cost effective alternative to cassettes to conceal the workings of your Roller Blinds.

Cassettes

Cassettes are the finishing touch to hide the workings of Roller Blinds.

Side Guides

Roller Blinds fit into side channels on the left and right to provide superior room darkening. They come complete with a cassette and are ideal for home theatres.

Shicane® Verticals

Shicane® has no bottom weights or chains allowing superior closure.

Fabric Verticals base options

Weighted base with no chain

Weights and chain at base

Sewn in weight at base

Blind & Curtain Options

Wand

The wand is an alternate option for Verticals and standard for Panel Glides, Curtains and Veri Shades.

MultiPelmet

This option is available for Roller Blinds, Verticals and Panel Glides. The fabric insert matches the material of your blind.

Curtain Tracks

Designer

Designer track offers a sleek and modern design and is suited to both contemporary and elegant curtain styles – available in white, black and anodised silver.

Residential

Residential track is a timeless classic and complements traditional architecture – available in white, black and anodised silver.

Glydea (motorised)

Somfy's motorised Glydea track is designed for more prestigious projects. Motorised curtains are becoming a standard inclusion in high-end homes, – available in white.

“**Enduragard®** Roller Shutters offer smooth good looks, privacy and a sense of security. They are designed and made in Australia to withstand the toughest conditions, providing effective thermal insulation and reducing the effects of exterior noise.”

Enduragard® Roller Shutters also offer a strong visual deterrent against burglary, and extra protection against storm damage, so your whole family can feel more secure and more comfortable all year round.

All Enduragard® Roller Shutters are tailor made especially to suit your home so you can be assured they will be meticulously hand crafted from the highest quality materials and superbly finished to deliver superior performance, durability and beauty.

Apollo Blinds is a licensed Amplimesh® Security Screens dealer. Apollo's Amplimesh® Security Screens are custom built and made to measure to your exact requirements from 316 marine grade stainless steel or 5052 marine grade aluminium. Available in sliding, hinged and double door panels they are suitable for both residential and commercial applications. There are 2 choices of screen:

SupaScreen® : High tensile stainless steel woven into a fine mesh ensuring optimum security without obstructing the view. Intrudaguard® : Made from a single sheet of aluminium with small holes to allow for airflow and visibility.

The colour of the screen is always black to ensure light can pass through but the frames can be customised to suit your home. A single or triple locking system is available on the doors. Apollo's Amplimesh® Security Screen frames are made from anodised and powder-coated aluminium that is resistant to both oxidation and corrosion.

Our screens have been tested and passed the security test, bushfire and fire attenuation test, cyclone missile impact test and knife sheer test.

Screens - Doors & Windows

Keeping the sun from beating down on your windows in summer not only reduces the heat inside but also helps save you money on cooling costs and in winter, Awnings can help retain heat.

Apollo's range of durable Awnings can handle the elements and our extensive range of designer colours and patterns add a whole new dimension to your outdoor aesthetics. You can choose from canvas, acrylics, screen fabrics, PVC and colourbond steel.

With many different styles, Apollo has an Awning to suit almost every application.

Awnings

Track Guided Systems

Australian made, Apollo Track Guided Blinds are the most secure of all the channel systems. The awning fabric is held taut and flat in fixed vertical channels using an internal ziplock, which eliminates gaps and secures it against strong winds. The Blinds can be operated manually or motorised, gliding smoothly within the channels, stopped wherever you want or locked in the down position.

Apollo Track Guided Blinds come in clear or tinted PVC to protect from wind and rain, and a wide range of coloured hi-tech screen fabrics for superior year round UV protection.

Folding Arm Awnings

Apollo Folding Arm Awnings are a stylish and clever way to transform large outdoor areas like courtyards and verandahs into delightful alfresco living spaces. When you don't need the Awning, the arms glide back, sliding the fabric onto a roller, neatly out of the way. Semi cassette or full cassette models conceal the mechanism and the roller inside a stylish hood.

Our Folding Arm Awnings can be operated manually by a crank or motorised and operated at the touch of a button, tap on your mobile device or the sound of your voice when integrated with devices like Google® Home & Amazon® Alexa®. They can be programmed to operate while you're away from home using your smart

Awnings

Straight Drop Awnings

Versatile Straight Drop Awnings beautifully cover large outdoor areas like decks and the outside of windows, providing privacy and protection from the elements, while maintaining air-flow. The Awning is effortlessly raised and lowered by a rope and spool onto a top roller. When completely lowered it can be safely fastened at the base rail with straps.

Apollo can manufacture your Awnings in a huge range of colours and patterns.

Automatic Awnings

Shade the sun's glare and keep your home cooler in summer with stylish, Automatic Awnings. They are ideal for ground floor applications, narrow walkways and outdoor areas that require the Awning to be as close to a window as possible. The Awning is operated by manually guiding the standout arms along the rails, which are fitted flush to wall. When the arms are angled to 90° they automatically lock into position.

You can have your Awnings made from a wide range of coloured and patterned fabrics.

Awnings

Sunsaver Awnings

The SunSaver Awning is a modern twist on a traditional awning. This is an ideal awning for heat, UV protection, and airflow where channels or frames are not suitable or too costly.

- The Soft Spring makes it much easier than a conventional hard spring awning to operate as it is not so difficult to pull down.
- Ideal for balconies and verandah situations, this awning is designed for sun protection only, during winding conditions the awning must be retracted.
- Standard Roll Only (cannot be reversed rolled).
- Five-sided bottom rail (colours as the Automatic Lock Arm awning).
- Stainless steel spring hook with an eye, attached to the bottom rail then attaching to a **D Saddle** when in a reveal or **screw eye**.
- Stainless steel universal brackets as standard
- Optional Pull Down Pole that locates to a D Saddle fitted on the bottom rail for higher-to-reach blinds
- The Blind has no stops or guides so must be fully retracted or locked down. Additional D saddles can be supplied for an additional cost.
- No hood option making the awning competitively priced.
- Max size 4000mm x 2750mm drop
- Fabrics Elements, Vistaweave Max, 99, 95

Pull down and push up or motorise! It's that EASY to protect yourself from the elements with SmartGuide track guided blind system. Specially designed tracks on both sides of the blind enable the fabric to glide smoothly and easily - stopping anywhere you want!

- One size hood fits all, so no need to worry about matching hood sizes depending on the size of the blind.
- One size bottom rail strong enough to accommodate all widths.
- Simple trouble free robust bottom rail locks that are designed for all-weather.
- Fabric tube reducers to minimise the fabric from building up from the side zip, therefore ensuring the fabric rolls as symmetrically as possible.
- No visible side or bottom spline, offering a more pleasing aspect, unlike some other systems.
- Competitively priced due to its minimal components and uncomplicated locking system.

“ Pull down and push up or motorise! It's that EASY to protect yourself from the elements with **SmartGuide** track guided blind system. Specially designed tracks on both sides of the blind enable the fabric to glide smoothly and easily - stopping anywhere you want! ”

Smartguide Outdoor Blinds

Awnings Options

Internal Tape Winch

Convertible Awnings and Roller Shutters may be operated internally with the winch.

An external tape winch is also an option.

Internal Tape Winch

For the internal operation of Convertible Awnings.

Track Guided Option

Specially designed tracks on both sides of the awning allows the fabric to glide up and down easily.

Rain Sensor

Suitable for Awnings without a steep pitch. An adequate pitch is required to allow rain to run off. A rain sensor automatically retracts the Awnings, preventing water pooling and stretching the fabric.

Wire Guides

Awnings traverse up and down the wire guides to restrict movement.

Perfect for Straight Drop Awnings.

Motion Sensor

Will detect the motion of the front rail on a Folding Arm Awning in windy conditions and automatically retract the Awning.

Sun & Wind Sensor

The sun sensor brings the Awning out when the sun hits your windows then takes it back when the sun goes down. While the wind sensor will retract the Awning if the wind is too strong.

Motorisation

Apollo's MaxiSMART® motorisation hub allows some of our awnings to be operated at the touch of a button, a tap on your mobile device, or simply the sound of your voice, when integrated with the world's most popular automation devices like Google® Home or Amazon® Alexa®. Not only can you program your awnings to automatically operate, you can also control them while you're away from home using your smart device.

“ Loose chains and cords can tangle and be dangerous to children. Motorisation puts convenience and safety at your fingertips - with just one touch you can position and align our window coverings perfectly. ”

Motorisation

Apollo's MaxiSMART® motorisation hub allows many of our blinds and awnings to be operated at the touch of a button, a tap on your mobile device, or simply the sound of your voice, when integrated with the world's most popular automation devices like Google®Home or Amazon® Alexa®.

Not only can program your blinds and awnings to automatically operate, you can also control them while you're away from home using your smart device.

Sensors

Apollo has a range of sensors for wind, sun, rain and motion.

Apollo Cares About Children's Safety

Blind cords can easily become tangled like a noose around a toddler's neck and strangle them in seconds. They can also strangle a baby in a cot by a window where cords are within reach, or hang into the cot. At Apollo we do all we can to ensure children remain safe.

We recommend products that are operated by wands or motorisation instead of cords. For all blinds with looped cords the installation of a cord tensioning device is essential. Loose cords should be wrapped securely around a cleat attached high on the wall.

You can help protect your children too by making sure your existing blinds have these proper safety devices and by following some simple precautions.

Make sure your children cannot reach any blind cords, and that the bottom of any cord is at least 160cm above the floor. Move children's cots, beds, high chairs or any other furniture that children could climb on away from windows.

When installing internal window covering we always ensure that a brightly coloured warning label is attached. Ask your Apollo installer to show you the safety features on new blinds and how to make your existing blinds safer.

At Apollo, your satisfaction is our highest priority, so we take our warranties seriously. We have operated for over 30 years and have covered over 2 million windows. Using the best quality components and fabrics, we manufacture to the highest standards, here in Australia, and overseas in partnership with some of the world's largest, most trusted manufacturers. So it's no surprise that we proudly stand by all our products, confident that we are giving you the best possible quality.

*These warranties are effective from 1st January 2019. Where a product under warranty is no longer available a substitute product from Apollo's current range to the same value will be offered as a replacement during the warranty period. Product care and operating instructions must be adhered to otherwise warranty will be voided. See apolloblinds.com.au/product-care-instructions.

The warranty is against defects in components and/or faulty workmanship for the above periods from the date of installation. The warranty does not extend to damage caused by accidents, misuse or abuse of the product and does not cover depreciation through ordinary wear and tear.

All other claims will attract pick up, delivery or service charges which will need to be prepaid. Please read the full terms and conditions on your order.

Additional Extended Warranties

Awning fabrics excluding PVC, are covered by a minimum of 5 years warranty. Roller, Panel Glide and Roman Blind fabrics are covered by up to 10 years warranty depending on the fabric.
